This is a blowpart of the paper-piecing.

This eagle block uses paper-piecing, strip-piecing, & Peaky & Spike Rulers.

I have also included the Rotary Cutting Charts for this pattern.

Eagle Block Size is 24" square Finished size. The image below has been MIRRORED.

When paper piecing, I recommend using the "No-Paper" Paper-piecing method found on youtube here:

Note: the image to the left is NOT to scale. See the actual pattern in a separate file if you wish to paper-piece. You can paper-piece if you do not have the Peaky & Spike ruler set.

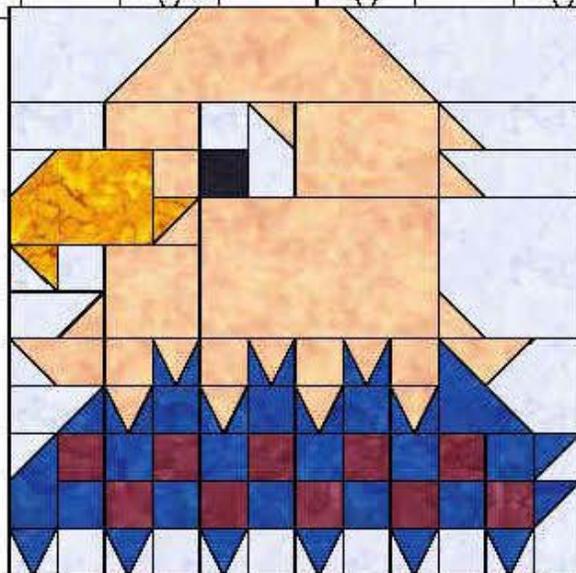

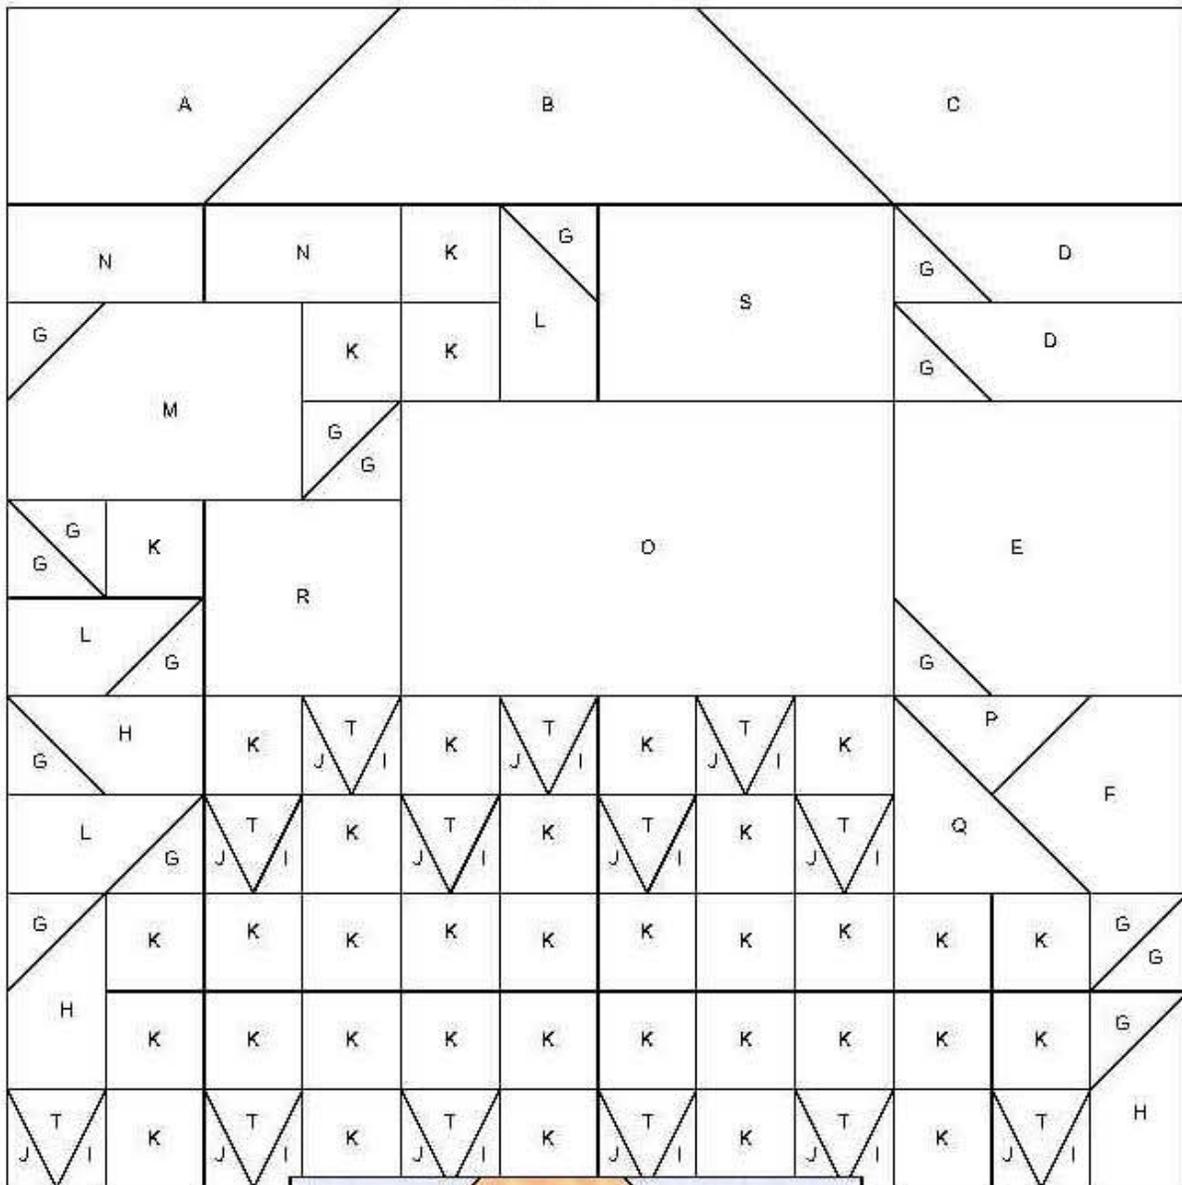

Make 7 with the “V” or Peaky section in eagle head fabric and the Sides or Spike sections in Blue. Cut the Peaky section 2” on your ruler. If strip cutting these pieces, add the extra that your ruler recommends. My ruler says to cut the Peaky section 1/2” wider if in strips. The peaky portion should be cut on the 2” line and if cutting in strips, add 5/8” wider strips. Cutting in strips, allows you to rotate and/or flip the ruler to save fabric.

Make an additional 6 with the “V” or peaky section in blue and the sides or spike sections in background fabric.

Cut an additional 2 1/2” squares (exact size) 4 in eagle head fabric, 3 in Blue, and 5 in background fabric. Sew together between the (PeakySpike) sections as shown on the blowpart on page 2.

On the following pages are the rotary cutting measurements for those who wish to use them. Please note, the diagram for rotary cutting does NOT match that of the one used for paper-piecing on page 1 & 2. Also, when a section can not be rotary cut, it is not included in the rotary cutting charts. These sections have to be cut and sewn using a different method. For example “F” can not be rotary cut and should be paper-pieced along with “P & Q” sections. There is a file separate from the main paper-piecing pattern that has just these sections. Also note when using the rotary cutting, no extra fabric has been added to the measurements. Cut accurately, and sew with a 1/4” seam allowance.
